

# Electric vehicle charging

## Are you thinking about installing electric vehicle charge points?

There are many types of electric vehicle charge points to choose from.

At **Futurum Renewable Energy Systems Ltd** we work closely with you to ensure we install the most suitable charge points for your needs – whether for your customers, staff or other visitors to your building.

We install cost effective charge points, as well as solutions to control access to the charge point, charge for its use and monitor who uses it.

### We install anywhere

We provide charging solutions for any environment, including:

- Public and private car parks
- Workplaces (fleet & private vehicles)
- On street parking
- Public sector buildings
- Homes
- Rapid charging

### Rexel recommended

**Futurum Renewable Energy Systems Ltd** is recommended by Rexel, the largest electrical distributor in the world.
